PROFILE

I'm a game programming graduate from The Game Assembly, Malmö, with a lifelong passion for game development. My interests span the full development pipeline, with a particular focus on engine programming, rendering systems, gameplay systems, and procedural generation.

I'm currently seeking both full-time and part-time opportunities in programming or QA, and I'm open to relocating.

PROFESSIONAL EXPERIENCE

Freelance

Remote

Game Programmer

Apr 2026 - Present

- Developing a to-be-announced incremental game in Godot, collaborating with a global multidisciplinary team.

Wolfgame

Remote

Game Programmer Intern

Sep 2025 - Apr 2026

- Collaborated with a global team of game designers, artists, and level designers to develop a vertical slice for an RPG using Unreal Engine 5.4.
- Utilized Unreal Engine's Gameplay Ability System to build combat and stat systems.
- Developed a world-state serialization system supporting persistence of gameplay objects, player progression, and AI state across save/load cycles.
- Documented development processes and tools to facilitate use and enhancement of our systems by future team members.

EDUCATION

[The Game Assembly](#)

Malmö

Game Programmer, Higher Vocational Education

Sep 2023 - Apr 2026

- Two years of full-time C++ programming.
- Developed 7 cross-disciplinary game projects using agile development practices in Unity, and an in-house and custom C++ game engine.
- Developed a custom DirectX 11 rendering engine in C++.
- Created a [fully procedural city generator](#) as the final specialization project.

PERSONAL PROJECTS

Vulkan-based 3D Game Engine (C++)

- A 3D game engine developed in C++, featuring a modern Vulkan GPU-driven bindless renderer.
- Additional features: Deferred lighting, skeletal animation, compute culling, cascaded shadow maps, SMAA.

TECHNICAL SKILLS

Programming: C++, C#, GDScript, HLSL, GLSL, Slang

Game Engines: Unity, Unreal Engine, Godot

Graphics APIs: Vulkan, DirectX 11, OpenGL

Tools: Git, Perforce, Visual Studio

OTHER

Languages: Swedish (Native), English (Fluent)

Hobbies: Gaming, music production, playing guitar, language learning (Chinese)
